

A plan helps the River Mimram in Hertfordshire. The Environment Agency gave money. Heidi Mansell helps farmers and landowners improve the river.

The River Mimram helps wildlife. It starts in Whitwell, passes Kimpton and Codicote. Plans include fixing riverbanks and removing weirs.

Heidi talks to landowners and looks for money to help rivers. This helps animals like Water Voles and Brown Trout come back.

River Mimram is a chalk stream in England. It's special but not healthy. This project aims to make it healthy again.
