

The UK will add 100,000 EV chargepoints to help people without driveways charge their cars easily.

The government will spend £4 billion to help people use electric cars, support carmakers, create jobs, and add more chargepoints.

Believ is investing £300 million for 30,000 chargepoints in the UK. The government is helping to make this happen faster.

Running an EV costs 2p per mile. Many can go 300 miles on a charge. The government is making deals to help carmakers and keep jobs.
