

The UK is funding carbon capture in Aberdeenshire and the Humber. This helps keep and create jobs and cleans the air by storing CO<sub>2</sub> safely.

The government is giving £9.4 billion to help make energy cleaner. This will help Scotland and the Humber lead in clean energy jobs.

Acorn and Viking projects get money to start. They will create long-term jobs and build pipelines to store CO<sub>2</sub>.

The money will help connect Grangemouth to store CO<sub>2</sub> under the North Sea. This keeps CO<sub>2</sub> safe and helps keep energy prices low.

The projects will create jobs. Acorn could support 15,000 jobs, and Viking 20,000 jobs. This will help the local economy grow.

The UK wants to lead in clean energy. This will cut carbon, protect the environment, keep energy prices low, and create many jobs.

These projects help the UK's future energy. They support clean energy goals and create good jobs. A big step for clean energy in the UK.
