

An MP wants to stop new fur being sold in the UK. Fur farming is banned, but imports are allowed. A new bill aims to stop this.

Some say the ban is bad as it may hurt trade and jobs. Others say it's needed for animal care.

Four Paws supports banning fur. Many countries and designers are stopping using fur in fashion.

Some shops sell old fur clothes. They say it's better for the Earth. The government is checking the fur trade and will share plans later.
