

Men's Health in England

The Men's Health Strategy wants ideas on men's health. Share your thoughts by 17 July 2025.

Men have health problems like cancer and heart disease. They live about 4 years less than women. Ideas are needed to help improve men's health.

People aged 16+ in England can share thoughts. Easy Read and BSL versions are available online. More info is on the GOV.UK website.
