

# New Laser Tech Helps Keep Soldiers Safe

Sentinel Photonics makes tools to find lasers. They started in 2020 and grew to 20 people by 2025. Their tools keep soldiers safe from lasers.

They got help to improve and sell their tools. Now, the UK Army and other NATO countries use them.

Sentinel Photonics made LASERD MAX to find lasers fast. FROST keeps eyes safe. Their work shows the value of growing new ideas.
