

The Prime Minister spoke at London Tech Week 2025. He was glad to see many people and talked about the energy and spirit of the tech community.

The Prime Minister said tech and AI are changing lives. AI helps in healthcare by finding clots in the brain fast, saving lives.

He talked about defence plans. It looks at risks and how AI can help. Tech and AI are important in defence and other areas.

The Prime Minister wants AI to help the government work better. A social worker used AI to finish paperwork quickly.

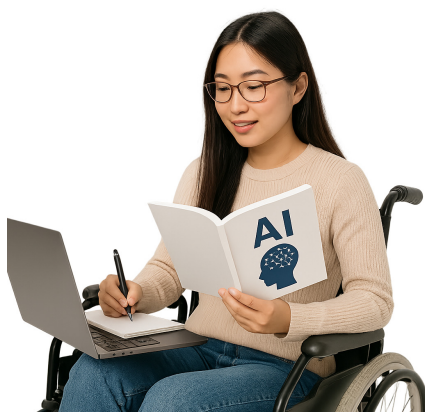

The tech industry creates jobs. The UK wants investment. A company is investing £1.5 billion in London.

The government will spend £1 billion on AI to improve public services and make life better for people.

The government wants to build faster using AI. A new tool helps councils work faster by making old papers digital.

AI can help in schools and hospitals. The Prime Minister wants more people to learn AI skills to help young people and businesses.

The government is helping young people learn tech skills in schools and universities by working with companies to train workers in AI.

The Prime Minister wants everyone to enjoy technology. He hopes young people will feel they can join in tech success.
