

A plane crash happened in Ahmedabad, India. An Air India flight to London hit a residential area after takeoff. People are worried about loved ones.

Families are waiting at the hospital for news. It is taking a long time to identify people because of a fire. DNA tests are needed.

Officials use DNA and dental records to identify bodies. The process is slow due to fire damage. Families are sad and want their loved ones home.

The Indian government is checking why a plane crashed. They are looking at other planes too. Experts from other countries are helping.

People are leaving their homes because of a crash. Students are moving out too. The crash has scared and upset many people nearby.

Families share stories of missing loved ones. They hope for answers soon. Waiting is hard, but they support each other in this sad time.
