

In Gaza, some people were shot near a food help place. The internet is bad, so they didn't know help places are closed until Sunday. It's confusing.

People wait near places for food. A Gaza hospital may not help injured soon. Many workers left due to safety worries.

The hospital needs help to stay open. If it closes, people won't have a place for special care. It's the only one nearby for important treatments.

Fighting began after an attack on Israel in October 2023. Many people have died. Help and internet are very important for people in Gaza now.
