

Weather forecasts help us know if we need an umbrella. Farmers and pilots need them to do their jobs safely.

AI can help make weather forecasts faster and more detailed. The Met Office is using AI to improve local forecasts.

AI helps predict storms and floods early, keeping people safe. But it needs old weather methods, especially for big storms.

AI might help with weather jobs, but people like real presenters. They trust them to explain the weather. AI will work with them, not replace them.

Weather presenters will keep their jobs. AI will help them. This means we might get better weather forecasts.
