

Fewer People Moving to UK Than Thought

The ONS says 345,000 people moved to the UK in 2024, 86,000 fewer than they first thought.

More British people left the UK than came back. 257,000 left, 143,000 returned. That's 114,000 more leaving. ONS uses tax records to count.

The UK plans to change asylum rules, checking status often and limiting benefits. They now use visa and border data to count EU migrants.
