

St Helena Airport Update

The AAIB is checking go-arounds at St Helena Airport from 17 June 2023. They weren't serious, but changes could improve safety. Report coming soon.

Make things safer with better runway lines, weather checks, and changing flight paths. This helps planes land safely at the airport.

The AAIB will share the full report when it is finished. This helps improve safety and shows how the UK checks and learns from air events.
