

World Oceans Day is on 8 June. It helps us learn about and protect oceans. Over 100 countries join. This year's theme is "Wonder: Sustaining us."

Oceans are too hot from global warming, hurting sea life and melting ice. Plastic pollution also harms wildlife and nature.

Use less plastic. Learn about oceans. Make ocean art. Eat vegetarian. Join a beach clean-up if you can.

World Oceans Day is for celebrating and learning to protect oceans. They cover 70% of Earth. Let's work together to keep them healthy!
