

Food Shortage in Gaza

People in Gaza don't have enough food due to aid limits. They eat only 1,400 calories daily, which isn't enough. Many risk going hungry.

The UN says food shortages in Gaza break laws. Children, pregnant women, and older people are most affected. The UN wants more aid to help them.

Many people in Gaza have died or are missing. The UN wants more trucks to bring food and help to stop hunger and lack of medical care.
