

Heart Device Concerns

Two UK hospitals used a heart device linked to more deaths. Despite NHS warnings, it was used. Families of patients who died want answers.

The Medtronic device was found to have more problems than its rival, the Abbott pump. Despite this, hospitals continued using it until 2021. Some.

Greg's family didn't know the risks. Greg died at 26 after a stroke and device failure. Hospitals are checking. Some want an outside investigation.
