

Helping Tech Grow in the UK

The UK will spend over £1 billion on tech. £670 million is for quantum computers and £380 million for biology research.

A new centre gets £19m to help UK businesses. £35m will teach chip-making, and £370m will improve connections and telecoms.

The government will spend £54 million to bring talent to the UK, improve cybersecurity, and support new tech businesses to lead in new technologies.
