

France, Germany, and the UK are worried because Iran is making too much nuclear material and not following rules.

Iran is making too much enriched uranium, which can be used for nuclear weapons. They are using new machines to do this faster, breaking the rules.

Iran is stopping some inspectors. This makes it hard to know if Iran's nuclear work is peaceful.

The E3 countries want Iran to follow the rules. If not, it could cause big safety problems for the world.

The E3 will work for peace and stop Iran from making nuclear weapons. They will share news about what happens next.
