

The Environment Agency has stopped a waste site in West Yorkshire. Mineral Processing Ltd must stop work and clear waste or face trouble.

The company has 20 days to appeal. If they do, they can keep working. The permit was taken away because the site was causing problems nearby.

The site was stopped due to too much waste and wrong types. There is a risk of pollution and bad smells affecting people and the environment.

The Environment Agency checks for rule-breaking and smells. Report problems to them or Crimestoppers.
