

The UK is testing digital train tickets in Yorkshire and the East Midlands for 4,000 people using GPS to ensure correct fares.

Trials on Leicester to Nottingham and Sheffield to Doncaster routes will last 9 months. Check East Midlands Railway and Northern Trains websites to join.

Trials aim to make rail travel easier and cheaper. The new system helps find the best fare. This may get more people to use trains.

The government is helping Greater Manchester have more contactless tickets for buses and trams to make travel better.
