

Fuel Prices and Competition in the UK

Fuel prices in the UK went down, but shops still make a lot of money. The government will help people find the best fuel prices.

Fuel margins changed a bit from Dec 2024 to Mar 2025. The retail spread is higher than before. The CMA will check costs for big fuel sellers later.

The CMA is checking fuel prices to keep them fair. A new scheme will let drivers see fuel prices online. It may start by the end of the year.
